ASSET TAGGING AND IDENTIFICATION

AssetTag's are a durable polyurethane tag designed to highlight key features, inspection dates and safety messages.

AssetTag Flex / Medium

Key Points:

- Flexible and Durable
- Weatherproof
- Variety of 8 Colours
- Single or Double Sided Print Options
- Custom Print Available

Perfect for use on a multitude of applications – from the identification of assets right through to inspection.

AssetTag's are manufactured from Polyurethane a highly flexible, durable material suitable for all weather conditions. Resistant to both high and low temperatures as well as most acids, alkalis and solvents.

AssetTag Flex works as a complete unit without the need for any further equipment. Simply using two integral slots the tag can be fastened through itself at two positions dependant on the application.

AssetTag Flex Medium is smaller in design - perfect for when space is at a minimum. Simply attached to any piece of equipment using a tie wrap, rivet or similar.

The AssetTag series is available in 8 different colours with a wide variety of print options – plain, pre-printed (as per the pictured selection) or fully customised with your wording or logo. Available in single or double sided print options.

These designs are available in all 8 colours and both sizes.
